| Sydney, NSW

Results-driven logistics and automation professional with 3+ years of experience in high-volume inventory management, automated material handling systems, and team leadership. Proven ability to minimise downtime, optimise stock flow, and maintain safety standards in 24/7 operations. Commercial aviation training has strengthened my SOP adherence, decision-making under pressure, and clear communication skills. Currently also assisting new recruits of Vanderlande through teaching and mentoring.

Skills

| SOP & Safety Protocol Adherence (LOTO, PPE, aviation standards) | Automated Systems Operation (Beckhoff conveyors, SCADA, ASRS, sorters, RF scanners) | Team Leadership & Task Delegation | Troubleshooting | Decision Making Under Pressure (aviation-trained critical thinking & problem solving) | Coaching/Mentoring |

Experience

Vanderlande / Automation Operator (Flow Controller)

Jan 2026 - Present (Sydney - Moorebank)

Key responsibilities

- Monitor and optimise high-volume automated material handling systems, ensuring continuous flow and minimal downtime in fast-paced logistics environments
- Respond promptly to operational alerts, alarms, error notifications, blockages, and system warnings to reduce operational bottlenecks
- Clear system jams, blockages, and minor faults while documenting root causes to support continuous improvement
- Perform routine housekeeping, low-risk maintenance tasks (e.g., sensor alignment, filter replacement, pneumatic leak fixes, consumable refills such as labels/foil/cartons) and general area cleanliness to uphold safety and reliability standards
- Collaborate closely with maintenance, project, and client teams to troubleshoot issues, provide guidance on equipment operation, and coordinate responses that reduced disruptions
- Experienced with pallet crane driving, working with contractors such as Inov8
- Operating systems such as Cyklop Packing System, Dematic cranes
- Exercise strict adherence to safety protocols, including Lock Out Tag Out (LOTO), PPE usage, and safe working practices in industrial automated settings
- Contribute to reliable 24/7 operations of advanced automation

solutions (conveyors, sorters, ASRS, robotic systems) for leading distribution clients

- Coaching/Mentoring new recruits to be independent operators & knowable on the Vanderlande systems
- Assist technicians with preventive maintenance and other mechanical jobs

Woolworths / Assistant Inventory Control Manager

May 2025 - January 2026 (Auburn Automated CFC)

Key responsibilities

- Delegated daily tasks to team members to achieve daily stock replenishments targets
- Provided operational insights and recommendations to streamline daily tasks and meet targets
- Resolving 20+ problematic article per day, resolving out of stocks
- Maintained consistent stock replenishment using Inventory IT systems and SCADA
- Diagnosed and resolved automotive, mechanical and IT system faults to minimise downtime
- Comprehensive understanding of Knapp Automotive systems

Australia Post / Casual Mail & Parcel Processor

November 2025 - December 2025 (Sydney Gateway Facility)

Key responsibilities

- Operated automated parcel systems (Beckhoff conveyor, bagging systems, and Visa Touch label printers)
- Sorting mail and parcels based on operational and security requirements
- Utilising RF scanners
- Managing inbound and outbound volumes based on geography

Woolworths / Replenishment Chiller/Freezer Team Member

March 2023 - May 2025 (Lidcombe Manual CFC)

Key responsibilities

- Ensured timely stock replenishment of both freezer and chiller products
- Enhanced customer experiences through stock replenishment & quality control
- Developing and maintaining new and existing product shelf display
- Managing stock investigations

Lidcombe Pharmacy / Pharmacy Assistant

April 2021- 2022

Key responsibilities

- Delivery of medications to patients
 - Managing pharmaceutical products
 - Medical Scripts & Label Management
-

Education

Sydney Flight College /Diploma of Aviation (Commercial Licence)

May 2023- July 2025, Bankstown Airport

- Achieved commercial pilot standards with strict adherence to SOPs and safety protocols in simulated and real flight environments
- Developed high-pressure decision-making and problem-solving skills through intensive simulator training and theoretical studies
- Enhanced leadership, clear communication, and adaptability — skills directly applied to managing automated systems and team operations in fast-paced logistics settings
- Built a strong safety-first mindset and ability to maintain composure during system faults and operational alerts

Ashfield Boys High School / High School Certificate

Graduated 2022
